

CARRIZO OUTLOOK

Published Weekly in the Interest of Carrizozo, and Lincoln County

VOL. IX, NO. 41

CARRIZO, LINCOLN COUNTY, NEW MEXICO, FRIDAY, OCTOBER 1, 1915.

PRICE \$1.50 PER YEAR

THE SUPERIORITY OF NEW MEXICO

Infant State Offers a Field of Advancement and Development Unequaled Elsewhere in the Nation

LET'S ALL BOOST OUR NATURAL RESOURCES

New Mexico, one of the infant twins of Uncle Sam's family, stands in a peculiar light before the elder members composing the household of this nation. She is gradually coming into her own, but the present trend of activity on the part of those who are vitally interested in her welfare and development is far behind the present day requirements. New Mexico offers a field of advancement and development, unequalled elsewhere, nature having been the master hand that laid the corner stone of her future prosperity.

New Mexico is rich in historic treasures, her meadow valleys and mountain sides, long ago, being the sustenance of the early pioneers of the United States. Here in New Mexico we find ruins of the ancient and prehistoric races of mankind, that are in themselves the wonder of this continent. Scientists have studied them, artists have attempted to transcribe them upon canvases, poets have sung their wonder and beauty, and shall we, who dwell in the very shadow of these marvels, say naught? Valleys where tens of thousands of long-horned cattle have grazed have fed the hungry and added wealth to their owners. Decaying cathedrals, and cemeteries where rest the ashes of those who blazed the trail of civilization across the lonely stretches of desert waste, that east and west might be joined, fertile productive farms whose broad acres were wrested from the cradle of nature by sturdy sons of Spain years and years ago, mountain peaks robed in snow that for scenic beauty rival the stately Alps, and whose crest have yet to be touched by the foot of man, millions of acres of virgin soil waiting to feel the touch of the twentieth century farmer that it might be a factor in the store-house of the world, sunshine that warms and strengthens mankind and fits him for the great and responsible tasks of life.

Never write a letter outside the state that does not tell of New Mexico and her opportunities. Were our older sister states way down east to have one tenth the material for advertising purposes possessed by this state, it would be spread broadcast throughout the universe and a spirit of co-operative boosting would manifest itself that would result in bringing thousands of people to the state.

Men who came into this state of ours less than three years ago with a meager farming outfit are today comfortably and happily housed in homes that are a source of pride to them and which are the result of a combination of brain and muscle with the fertile valleys of this state.

Men who scaled the mountain peaks or hewed their way into the

vastness of a canyon in other states, have taken from the rocks and ledges of this state many millions of dollars worth of ore. And the hills of this state, standing majestically near the sky line, have for their foundation millions of tons of the highest grade coal awaiting the miner's pick.

With these resources and the proper spirit of co-operation in advising the world of the same, New Mexico will in a short time, be the mecca of those seeking pleasure, the shrine of those who worship art, the granary for millions of cereals, the corral of thousands of sleek, well bred horses and cattle, the home of the contented and prosperous.

Let us exploit, let us proclaim yes, let us learn for ourselves what New Mexico contains, and then, with an earnestness that is convincing, we can and will lead others within our borders.

"FESTIVAL DAY" ADDITIONS

A number of eleventh hour attractions of genuine merit have been added to the big Field Day celebration now in progress. Among them the following may be mentioned as of special interest to visitors:

A delegation of expert rock drillers from the mines at White Oaks consisting of four adept teams, will contest for the benefit and enlightenment of the visitors. The actual mineral bearing rock has been brought here especially for this exhibition of skill, and as these men are practiced drillers, doing actual work, some genuine good drilling will be done here today.

Another thing which is proving of intense interest to visitors, especially to the ladies, is the display of fancy work of all kinds at the court house. This feature is a new one and has proven a most popular addition to the regular events, as many excellent pieces of work are on display, representing much skill and painstaking on the part of the owners.

At no time has this annual time of celebration been more completely representative of the industries and pursuits of all the people of the county. This is as it should be, and Carrizozo feels itself honored with the unusual number of interested visitors, and considers itself amply repaid for all expenditures of money in securing the very best of everything and for any personal sacrifices of any nature whatever.

SUPT. McCURDY HONORED

Supt. Andrew McCurdy of the Carrizozo school has been the recipient of a signal honor, in that he has been requested by President Euloe of the Silver City Normal to prepare and outline for Algebra study in county teachers' institutes for the next six years. The new manuals will be printed by the first of the year and the various outlines will be the contributions of the leading educational men of the state, so the patrons of the local school may share in this unusual distinction accorded its superintendent.

H. S. SEWING CLASS ACTIVE

Anyone having any towels, tablecloths, napkins, dust-cloths or any other articles to be hemmed may have this work done free of charge by the high school sewing class. One letter will also be embroidered on any piece of linen, all materials to be furnished by the owners.

THE TWO BIG "FALL FESTIVAL" DAYS

Crowds Are Assembling For The Two Days of Sport And a Record Breaking Crowd is in Attendance

MANY BLOODED HORSES HAVE BEEN ENTERED IN THE RACES

Carrizozo is now in the midst of the biggest Field Day celebration in its history. People from all over the county, and even from surrounding counties, for miles around are arriving in autos, carriages, wagons and on horseback to unite with Carrizozo in making this a genuine time of rollicking jubilee. And not only a good time is being had but a profitable one, and those who are availing themselves of this unprecedented opportunity to see what kind of a county they are living in, are seeing that it is a live one, resourceful and rich in all its harvests.

A specially appointed reception committee is welcoming the visitors to the city. The hand shakers are holding forth at the Lincoln county court house and the band is there to assist in the spirit of good cheer which pervades the very atmosphere. That big El Paso band cost the business men of this town some cash, but it is proving itself a splendid addition to the success of the two days, and they say that the selected orchestra which will be on the job tonight and tomorrow night is a bunch of irresistible melody makers.

The agricultural exhibit is a winner. Not even the oldest citizens had any idea of the possibilities in the way of an exhibit. Such a variety of valuable crops and representatives of mineral wealth untold. The Carrizozo school has on exhibit some of the rarest gems of the art of cooking in the form of loaves of bread, cakes and tempting candies, a veritable revelation of what the coming generation of Carrizozo cooks will be (Boys here's the chance of your lifetime.)

The initial basket ball game of the big series between Carrizozo and Capitan will be played an hour earlier today than scheduled to allow the visitors to recuperate for the big game they play this afternoon. This makes the time of the game 9:30 a. m. but as the visiting delegation arrived from their mountain home last evening, they are in fine trim for the early morning contest and no doubt prove worthy opponents for the local teams of experts.

The big barbecue to be served free to all comers tomorrow noon is now in process of preparation and is being gotten to its state of finest savor by experts in the barbecue game. The choicest beefs are in the deal and the people may expect a feast when the horn blows for dinner. A committee which has proven itself in time past to be able to meet the most stupendous demands on their services will show the guests how indefinitely they can perform, and no one will be allowed to want for anything it is in their power to bestow in the

way of plenty of good substantial eats, besides the one big prominent item of juicy barbecued beef.

The teams from Alamogordo and Tularosa will arrive today noon on number 8 and a big delegation of students and townspeople will be entitled to anything in town but the game—and that too if they can win it.

And never before has the town been visited by so many blooded horses. The racing feature is proving a winner this year as it has never been before. There will be some expert goat ropers in the contest. There would be some expert broncho busters on exhibition too, but the past experience of the field day management has been that the bronchos refused to "bust" sufficiently to make it an interesting feature for either the busters or the crowd, so they have wisely discontinued anything in which the element of action is at all doubtful.

See the baseball games today and tomorrow. They bid fair to be fast, snappy exhibitions of the national sport. The best that Carrizozo and the Fort have in the shop and that celebrated team of shoppers from the Southwestern plant at El Paso will cross bats for a fight to the finish.

In short, we will say to you visitors, "Don't miss any of it. Make yourself at home, for you are our guests and we're here to make you feel it." Welcome visitors to Carrizozo.

WILL RESUME OPERATIONS

The Melvers coal mine at Willow Springs will resume operations in a short while, as Mrs. Melvers is in El Paso arranging for a competent manager. The mine will be worked on a larger scale than ever and the work as planned will be continuous. The local demand for this fuel has always been excellent, as it is the best coal in New Mexico as far as experience of those in this section extends. The people of Carrizozo and vicinity will be glad to know that they can get this fine coal at a nominal cost and the mine will afford employment to a number of miners and haulers, thereby adding that much to the industry of this district.

NOT AN IMPEACHMENT

Newspaper subscribers who are in arrears should bear in mind that a due is not an impeachment of their integrity, but simply an outcropping of a publisher's necessity. For instance, a thousand men owe him from one to four dollars each. It is a small amount to each individual, but to him the aggregate is large. Instead of becoming indignant because the publisher asks for this honest dues, the delinquent subscriber should be grateful to him for waiting so patiently, and pay up.

FORD GARAGE

The most recently development in the garage business of Carrizozo is the new Ford Garage which has been opened on El Paso Avenue near the Outlook printing office. Walter H. Smith an expert and experienced mechanic will be in charge of this new venture, and the enterprise will, as its name signifies, cater especially to operators of Ford machines. A complete service station for this universal car will be maintained and anything in the way of Ford accessories or mechanical parts will be furnished on short notice. As this newly established garage bids fair to be a great accommodation to both Ford owning public we bespeak for it the signal success which it deserves.

SHALL COTTON BE TAXED IN THE FUTURE?

Courts Are Asked to Settle Another Case Caused by The Blunders of The Democratic Party

MORE EVIDENCE OF DEMOCRATIC SLOVENLINESS

Democratic carelessness has raised a doubt as to the integrity of the law taxing future sales of cotton and has thrown the statute into the courts.

A suit has been brought in the federal courts to test the constitutionality of the act, on the ground that it is a revenue measure originating in the Senate.

The title declares that it is "an act to tax the privilege of dealing on exchanges, boards of trade and similar places in contracts on the sale of cotton for future delivery."

It was introduced by Senator Smith of South Carolina, and was first passed by the Senate, the House afterwards approving the Senate bill with amendments. Section 3 of the act provides that "upon any contract of sale of any cotton for future delivery made on any exchange, etc., there is hereby levied a tax of two cents for each pound of cotton included in such contract."

The administration of the law is delegated to the commissioner of Internal Revenue.

Section 7, article 1 of the constitution provides that "all bills raising revenue shall originate in the House of Representatives."

It is on this section of the constitution that the plaintiffs in the suit rely, together with the claim that the Smith bill was in the class referred to in the constitutional requirement and the fact that the law was first passed by the Senate.

The courts may or may not decide the case in favor of the government. The fact remains that by the exercise of ordinary care and forethought, the Democrats could have prevented all doubt and litigation at this point by the simple expedient of first passing the measure in the House.

Their failure to exercise such care still further contributes to the increasing evidence of Democratic slovenliness and inefficiency.

ENTERTAINMENT POSTPONED

The measuring party which was to have been held under the auspices of the Home Mission Society last Friday evening at the home of Mr. and Mrs. McCurdy was made a physical impossibility by the menacing rain which came up late that evening. A pleasant social time was enjoyed by the nearest neighbors, but the main body of the entertainment as planned has been postponed to some time in the near future. A large number of interested townspeople will be glad to know that this novel entertainment has not been entirely abandoned and notices will be issued when the date is again definitely settled. The ladies were able to dispose of all entrees to good advantage, so no actual loss was experienced.
